

Marine Water Heaters

The new Spa range!

isotherm

Isotemp Spa is Indel Webasto Marine's brand new range of water heaters, available in five different sizes ranging from 15 to 40 liters capacity. They match high marine quality standards such as a stainless steel inner tank, a robust polypropylene casing and a 6 bar safety valve.

- 5 different sizes from 15 to 40 liters capacity
- Stainless steel AISI 316 inner tank
- 6 bar safety bar
- Optional mixing valve
- Extra thick insulation for high performance
- Outer casing made of high quality polypropylene
- Customisable with valves, voltage and nominal power of the heating element

Technical specifications

Article number	Type	Volume (l)	Dimension (Ø x L) (mm)	Weight (kg)	Rated pressure (bar)	Heating element	Normal power (kW)
6P1531SPA0100	Spa 15	15	310 x 450±5	7.3	6	230	750 std
						115	750 std
6P2031SPA0100	Spa 20	20	310 x 550±5	8.3	6	230	750 std
						115	750 std
6P2531SPA0100	Spa 25	25	310 x 650±5	9.5	6	230	750 std or 1200
						115	750 std or 1200
6P3031SPA0100	Spa 30	30	390 x 535±5	11.7	6	230	750 std
						115	750 std
6P4031SPA0100	Spa 40	40	390 x 640±5	13.3	6	230	750 std or 1200
						115	750 std or 1200

Electric immersion heater: Copper covered by Nickel. Water connections: 1/2"

Changes of the specifications may be done without prior notice

- Corrugated and extended surface of the single coil for higher heat exchange efficiency
- High quality stainless steel AISI 316 materials and same proven high-performing internal design of the renowned ranges (Slim and Basic stainless steel water heaters)
- Outer casing made of high quality polypropylene, grey colour
- Immersion heating element in copper nickel plated tube to heat water when the engine is not running: 230 V/750 W as standard, 115 V/750 W opt; 1200 W opt. on 25 and 40 L
- Electrical plug and play
- Extra thick insulation for minimal heat loss during operation
- Fixing brackets in non magnetic stainless steel AISI 304
